Greetings:

On behalf of Pennsylvania's education community, it is a pleasure for me to welcome you to this year's HXCS Teacher's Conference.

I especially would like to acknowledge the participants from HXCS's two branch locations in my home state of Pennsylvania – the Great Valley branch in West Chester, and the Lehigh Valley branch in Bethlehem. I hope you and your colleagues from New Jersey, New York and Connecticut use the opportunity to learn from and share your best practices with each other.

I understand that in addition to serving families of Chinese background, the HXCS schools are serving an increasing number of students from local residents and other non-Chinese-speaking families in various Chinese and cultural classes -- a wonderful opportunity to introduce the rich Chinese tradition and heritage to the general public.

You have my best wishes for a productive and successful conference.

Sincerely,

A handwritten signature in black ink, appearing to read "Tom Gluck".

二. 教材: 教材问题的主要表现是适用教材的短缺。我们从以下几个方面讨论这个问题: 以往和现存教材的问题; 教材的多样性和适用性; 国别教材的需要和可能; 中文学校的教材。

三. 教法: 教法问题的表现有几个方面: 国内外派教师的不适应; 海外和国内教法问题上的盲目和单一; 不能根据教学对象灵活使用教学法。我们强调的是教学法的适用性。针对华裔学生的教学方法以及他们从中小学到大学汉语学习的连贯与衔接将是我们谈论的主要方面。

The new era in school information technology

Spiral Universe integrates a range of customizable features into one versatile software suite delivered through a state-of-the-art Webtop interface and designed to meet the demands of all members of a school's community.

Comprehensive & Flexible

Spiral presents a new generation school information management system that increases efficiency, reduces costs, and improves school administration. Spiral is a seamless experience in which all modules and tools are tightly knit together to eliminate redundant tasks, simplify data sharing, and ensure data integrity. It can be easily customized by schools and requires minimal implementation effort.

Web-based & Secure

The entire Spiral system is Web-based, providing real-time access to all its features from any standard Internet browser. Spiral's cutting edge Webtop technology combines the responsiveness of the desktop application with the advantages of a web-based system. Multiple redundant servers located in a state-of-the-art data center ensure that your data is always available. We use bank-level security to protect your data, including regular data backups, as well as 128-bit encryption of all data transferred between our servers and users' browsers.

Friendly & Fun

Spiral comes with detailed help guides and tutorials, but most users need minimal or no training to take advantage of its full potential. Spiral strives to develop a system that all of its users (administrators, teachers, students and parents) enjoy.

Engaging

Spiral encourages parents to be more involved in their children's education and forges a stronger school community by providing access to data and facilitating communication between educators, parents, and students.

Free

We believe that all schools, regardless of location or financial strength, deserve the best information technology.
